EDUCATION

Master and Bachelor of Science in Information Systems | Marriott School of Business | BYU | Provo, UT

April 2025

WORK EXPERIENCE

Software Engineer - Sunwest Bank - Sandy, UT

June 2025 – Current

- Streamlined lead generation by developing Python scripts and custom WordPress plugins that unified multiple contact forms in a reusable, Salesforce-integrated system – improving data consistency.
- Automated customer engagement tracking with a Python service that pulls daily email campaign data and logs activities in Salesforce, giving sales staff visibility into recent contacts and improving follow-up timing.
- Improved Salesforce deployment reliability by refactoring Apex tests and raising the automated test pass rate from 40% to 100%.
- Built an internal AI adoption site to help employees understand available AI tools, use cases and onboarding resources – a self-service site now used by the entire company. (500 employees)
- Designed and implemented a Salesforce automation using Lightning Web Components, Azure Functions, and Microsoft Copilot to auto-generate, populate, and manage preflight PDF documents – reducing manual processing time by 30 minutes per customer.

Founder & Developer - BeThere - Provo, UT - btscheduling.com

June 2024 – Current

- Designed, developed, and launched a feature-rich event scheduling app to streamline team collaboration.
- Managed a growing user base of 60+ users and staffed over 800 events.
- Acquired 3 client teams, demonstrating product-market fit through sustained user engagement.
- Generated \$700 in revenue in the first 2 months of release and cut down wasted collaboration time by 50%.

Teacher's Assistant - Brigham Young University - Provo, UT

August 2024 – December 2024

- Designed an interactive escape room simulation that required 120 students to apply course concepts to solve cybersecurity challenges, reinforcing hands-on learning in a high-engagement format.
- Mentored 30+ students one-on-one and group support in the Master's-level Offensive Security course.

Adjunct Professor - Brigham Young University - Provo, UT

May 2024 – June 2024

- Taught an Intro to Information Systems course with 140 students, focusing on SQL, VBA, HTML/CSS, Javascript, and Tableau.
- Delivered weekly instructional videos and emails to guide students through course material.
- Provided individualized support to students via one-on-one tutoring sessions.

Web Developer Intern - FamilySearch - Lehi, UT

June 2023 – April 2024

- Led early development of an AI-powered search tool using the OpenAI API while teammates were occupied with other projects, enabling beta launch within 4 weeks and showcasing at RootsTech, a worldwide FamilySearch conference.
- Engineered administrative dashboards leveraging React, empowering over 6,600 FamilySearch centers in 140 countries to manage and publish time-sensitive information to the public.

Student Developer - Missionary Training Center - Provo, UT

February 2022 – May 2023

- Developed flashcard tools to expedite language learning for thousands of missionaries speaking foreign languages.
- Synthesized feedback to discover new ways to improve the language-learning experience.
